

STATEMENT OF PURPOSE

RS21686

The purpose of this proposal is to clarify the timeframe in which requests can be made for the remission of bond monies; within one (1) year from the date of discharge of the offense for which the offender was serving parole. Additionally, monies may be used for the extradition of parole violators.

FISCAL NOTE

Modifying the statute will reduce the State's obligation to remit bond monies, with the exception of those that have requested same within the specified period of time, thus allowing for the State to capture and direct these funds toward extradition costs. Additionally, this modification would allow the State to discern monies on hold pending requests versus monies that are no longer obligated to requestors and are solely for the purpose of extradition costs of parole violators.
